

ProVoice Unified Communications

**Communicate & Collaborate,
Anywhere, Any Time,
On Any Device!**

**ONE IDENTITY, MULTIPLE DEVICES,
FOR ALL SERVICES INCLUDING
PC, MAC, IOS AND ANDROID**

ProVoice Unified Communications (UC) is the integration of real-time communication services such as voice and video telephony, chat, presence information, desktop sharing, call control with non-real-time communication services such as voicemail, e-mail, SMS and fax.

ProVoice UC allows businesses and employees to communicate whenever, wherever and however they choose. ProVoice's UC solution delivers its customers the ability to choose from multiple collaboration tools to deliver best in class end-users experience while giving businesses the tools they need to stay productive and efficient.

For example, with ProVoice UC users can begin a voice conversation, add video, then chat, add more users and share their desktop all at the same time.

ProVoice UC can be accessible from any device including Windows and MAC, and iPhone, iPads, Android phones and tables.

Key Benefits:

- **Increase your personal productivity.** Be more productive - call, video, chat, message, conference, and collaborate – on any of your communication devices.
- **One number reaches you wherever you are, on any device.** Never miss a call - be reachable regardless of device and location.
- **Find who you need when you need them.** Speed up communication using location and presence information for all your contacts. Communicate with the most appropriate mode for the situation (chat, voice, video, etc.)
